

Jagiri's Kutumbam

Family Memory Management Application

Connect · Remember · Celebrate · Grow Together

Web & Android · Private family portal

Agenda

01	Purpose & vision
02	Platform access
03	Core modules
04	Admin & security
05	Summary

What Is Jagiri's Kutumbam?

A secure digital home for the Jagiri family to preserve identity, history, and connection.

- Central directory of family members with rich profiles
- Visual family tree built from parent–child relationships
- Photos, events, maps, and analytics in one place
- Role-based access — only approved members can sign in

Platforms & Access

Where it runs	Getting started
● Web app — modern browser (desktop & tablet)	● Register or receive credentials from an admin
● Android app — native shell via Capacitor	● Sign in with username & password
● Responsive layout with dark & light themes	● Forgot password & privacy policy supported
	● Notifications via the bell icon in the header

[01] Dashboard

Your family command centre — key metrics and charts at a glance.

- Live counts: members, living/deceased, upcoming birthdays
- Charts: births by decade, gender, blood groups, deaths by year
- Recent announcements and activity feed
- Quick navigation to members, gallery, and events

[02] Family Members

Complete, searchable directory of every family member.

- Add & edit profiles — photo, dates, parents, spouse, occupation
- Smart filters: village/place, surname, gender, living status
- Filters hidden by default — tap Filters to expand on mobile
- Tap any member to open a detailed profile page

[03] Family Tree

Interactive visual genealogy — automatically built from member links.

- Vertical tree with spouse pairs shown side-by-side
- Click any card to open the member profile
- Pan, scroll-to-zoom, Fit, Zoom in/out, and Full screen
- Optimized for both web and mobile viewports

[04] Reports & Analytics

Demographic insights with drill-down to member lists.

- Core: total, living, deceased, male, female members
- Age groups for living members (children to seniors)
- Additional: blood group, occupation, village, and more
- Tap any report card → view filtered member table

[05] Photo Gallery

- Shared family photo album accessible to all members
- Browse uploaded memories in a clean gallery grid
- Upload new photos from the gallery module
- Photos served securely through the family backend

[06] Events

- Family events calendar — gatherings, milestones, reminders
- Events surface on the dashboard upcoming list
- Helps the family stay aligned on important dates
- Easy to scan on mobile and desktop

[07] Places & Map

See where family members live and explore locations visually.

- Interactive map with pins grouped by place/village
- Tap a pin → member list with profile links
- Open Google Maps directions from any location
- Filter panel for place and surname on mobile & web

Search · Contact · Account

- Global Search — find members quickly across the app
- Contact Us — reach family organisers
- Account & Privacy — profile settings and data controls
- Privacy Policy page for transparency

[08] Admin Portal

Available to administrators only.

- User management — create, edit, and approve access
- Announcements — broadcast news to all members
- Audit log — track sensitive changes
- Keeps the family network secure and well-governed

Technology Stack

Frontend & mobile	Backend & data
● React 18 + Vite	● Node.js + Express REST API
● Tailwind CSS, Recharts, Leaflet	● PostgreSQL (my-family database)
● Capacitor 8 — Android app	● JWT authentication & role-based routes

One App. One Family. All Connected.
